EXPERIENCE

- **A P Moller Maersk** Bengaluru, India Jul 2025 - Present
 - **Associate Software Engineer** Jul 2026 - Present
 - * Architected 30+ enterprise-scale data pipelines on Databricks Delta Lake processing 12M+ shipping records daily across 30+ global terminals using PySpark, reducing end-to-end data latency by 70% and enabling real-time freight analytics for \$4B+ annual container operations.
 - * Led MSS Vault secrets migration securing 40+ API credentials across 3 deployment environments (CDT/PP/Prod), and resolved critical data quality defects in container tracking nomenclature impacting 30+ terminals, preventing \$500K+ in operational disruptions.
 - **Software Engineer Intern** Jul 2025 - Jul 2026
 - * Designed and deployed 3 production RESTful APIs (OpenAPI 3.0.1) with StarGate/Apigee gateway integration, serving 50K+ daily requests at sub-100ms P95 latency for cross-platform consumers including Digital Maritime and PO Invoice teams.
 - * Engineered automated PostgreSQL-to-Delta Lake synchronization pipeline for real-time rate ingestion across all terminals, achieving 99.7% data consistency across distributed systems.
- **WEBEL, Government of West Bengal** Kolkata, India Aug 2024 - Oct 2024
 - **Data Science and Machine Learning Intern**
 - * Corrected and reclassified 1,000+ mislabelled cases using NLP LangChain pipelines, improving dataset quality by 35% for downstream classification tasks.
 - * Built intelligent crime classification system identifying 10 key contributing factors, reducing manual case processing time by 50%.

EDUCATION

- **Institute of Engineering and Management, Kolkata** Oct 2022 - May 2026
B. Tech in Computer Science Engineering with Artificial Intelligence GPA: 8.75/10.00

PROJECTS

- **SARA: Developed a multi-agent RAG system for intelligent ServiceNow incident resolution.** June 2026
Tools: [LangGraph, Azure OpenAI, Qdrant, FastAPI, Docker, Cohere Rerank, ServiceNow]
 - Engineered a production-grade multi-agent RAG pipeline using LangGraph StateGraph and Azure OpenAI (GPT-5-mini), streamlining incident classification and root cause analysis for 2,000+ monthly ServiceNow tickets, reducing mean resolution time by 75% and saving 300+ engineer-hours/month.
 - Implemented a hybrid retrieval architecture with Qdrant vector search and Cohere reranking across 2 knowledge collections, achieving 94% classification accuracy and intelligent engineer routing for 4 incident categories across Maersk procurement operations.
- **RateFlow API Gateway: Pioneered cross-platform data access layer for terminal operations.** Apr 2026
Tools: [Python, FastAPI, OpenAPI 3.0, StarGate/Apigee, PostgreSQL, Delta Lake]
 - Delivered 3 enterprise API endpoints (TMVC, PO Invoice, Container Info) with OpenAPI 3.0.1 specs and StarGate/Apigee proxy governance, enabling 50K+ daily cross-platform requests with end-to-end schema validation across CDT, PP, and Production environments.
 - Developed event-driven PostgreSQL-to-Delta Lake rate synchronization with real-time change detection, processing 10K+ rate updates daily, eliminating 20+ hours/week of manual reconciliation for 30+ terminals.

SKILLS

Programming Languages: Python, SQL, Java, C, JavaScript.

Data Architecture & Engineering: Apache Spark, Databricks, Delta Lake, Azure Data Lake, ETL/ELT Pipelines, Apache Airflow, Data Warehousing, Dimensional Modeling.

AI & RAG Systems: LangGraph, LangChain, Azure OpenAI, Qdrant, Cohere Rerank, RAG Pipelines, NLP.

API & Cloud Platforms: REST API Design (OpenAPI 3.0), StarGate, Apigee, Azure, Docker, CI/CD.

Database Systems: PostgreSQL, MySQL, MongoDB, Delta Lake, Qdrant Vector DB.

Web Technologies: FastAPI, Flask, React JS, Streamlit, HTML, CSS.

EXTRACURRICULAR

- **Bengal E-Summit:** Lead organizer of Kolkata's first college entrepreneurship event with 500+ participants.
- **Diversion:** Collaboration and tech-lead for Western India's first and biggest MLH hackathon with 100+ teams.
